# CIP 2.0: Re-engineering Capital Improvement Programs

**Panel Discussion**  
June 2015

**As we've entered into the 21<sup>st</sup> Century, the K-12 Educational Facilities industry is investigating new facility options and challenging traditional methodologies. This trend has entered a transformational state.**

---

This session explores how the planning, design, and building community can adapt to most effectively maximize value on Capital Improvement Programs from multiple perspectives and how teams must evolve in order to best deliver 21<sup>st</sup> century learning environments.

This panel discussion is presented as an interactive engagement of challenges and solutions facing the K-12 Capital Improvement Programs of today and tomorrow.
